

Here's what happened...

My story may help you.

"I knew something wasn't right. I had a little bloating and some lower back pain. But what really worried me was the bleeding between periods. It wasn't normal for me.

It turned out I had ovarian and uterine cancers. Getting diagnosed and treated wasn't easy. But now my doctor and I are optimistic about my future.

Please listen to your body. If something doesn't feel normal for two weeks or longer, see your doctor."

— Jennie M., Washington, D.C.

Gynecologic cancer includes cervical, ovarian, uterine, vaginal, and vulvar cancers. Signs and symptoms are not the same for everybody...so get the facts.
